Can you get creative and draw the two YAA helicopters flying in the sky?

Make your own paper aeroplane!

**Find a piece of A4 paper & have a go at
making your own paper aeroplane!**

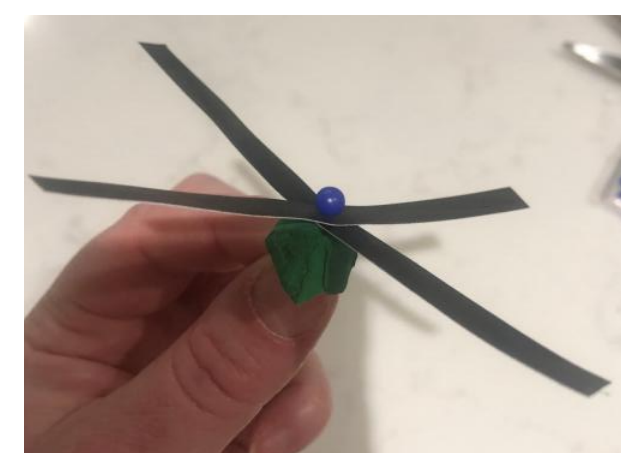

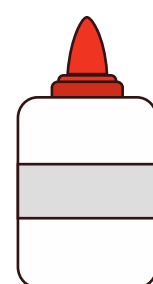

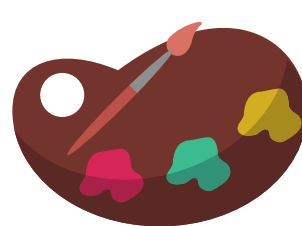

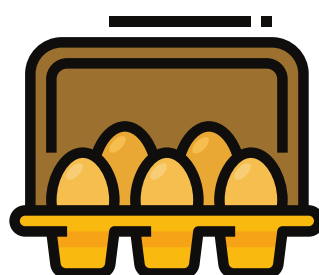

Make your own egg box helicopters!

Have a go at making your own mini versions of our YAA helicopters G-YOAA & G-YAAC!

You will need:

- An empty egg box
- Card
- Paper fasteners
- Paint & brushes
- Glue (ideally PVA)
- Scissors

- Use the egg carton to cut out the pieces you need for the helicopter - the egg cup for the helicopter body, the pointy part, cut in half long ways for the tale, and the tip of another pointy part for the blades to attach to.
- Get creative and paint the parts however you'd like them!
- Whilst the paint dries, make your rotor blades. Cut two pieces of card approx. 20cm long by 0.5cm wide.
- Use a paper fastener to connect the blades together to make an X shape (ask an adult for help with this part). Then push the paper fastener through the round top part and secure. Put the blades to one side for now.
- Once the paint has dried, you can start to assemble your helicopter. First, glue the tail boom (long pointy bit) to the back of the helicopter body.
- Then glue the blades part to the top of the helicopter body.
- Well done! Your egg box helicopter is now finished!
